About Light & Motion

More value for your production is what Light & Motion is all about. We do this by combining Lighting & Grip gear in the one affordable combo package. Furthermore any of Light & Motion's Camera Cranes, Cable Camera Systems & Studio facilities can be added into your package. Giving you more production value for your money.

Steve Isaac ACS – Owner of Light and Motion

Steve works as a Director of Photography, Lighting Director, Director/Cameraman, B Camera, Jimmy Jib & Technocrane Operator

Steve started his career when he graduated from the Wandsworths Film & TV Polytechnic (UK) in 1972 worked as a news photographer & news cameraman in the UK before emigrating to Australia in 1973. Worked for Channel 7 & 10 and headed up a Special Projects department for Channel 7 in Canberra for many years. Since then he has been awarded many ACS awards over the years and received his ACS accreditation in 1990.

In 1994 Steve started Light & Motion with the purchase of the first Lighting & Grip combo Van. Since then Light and Motion has grown to incorporate a mid-sized lighting and grip combo van, a mid-sized lighting and grip combo truck, 4 jimmy jib cranes, film silenced generators, a Moviebird ST30 technocrane, 2 aerial cable camera systems, numerous remote heads, camera packages and a new infinity cyc studio.

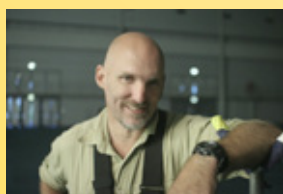

Steve has over 30 years experience in the industry using 16mm & 35mm Film, tape and digital cinema cameras. He has covered all aspects of the industry from current affairs, corporates, commercials, outside broadcasts, documentaries, Reality TV shows and second unit features.

Some of Our Crew

Light and Motion would like to recommend these technicians for your next project. Go to our website for more information

Fixed Arm Camera Cranes

From 7' to 40'

Jimmy Jib Triangle 2 or 3 axis remote head crane

An industry classic with a 7ft to 40ft reach. This Jib is a two person operation with a Jib operator & a Jib swinger/spotter. The 25' version can be mounted on the back of our 6 wheel 4WD gator for those rough terrain shots or with turf tyres we can travel over golf courses and other grass covered sporting venues.

Mini Remote Jib (5' to 19')

The lightweight baby brother of the jimmy jib. The Mini remote jib has a maximum height of 19' and is ideal for those rough inaccessible locations. A one man operation of zoom, iris, focus and stop start. 4 x travel cases weighing under 32kgs each. Perfect for flying. Lightweight & portable offering big production value.

Jib rates from \$550/day + crew*

Mini Jib

Highly portable with an almost instant set up time is perfect for those small moves with an 8ft height. Kit comes with an arm, 100/150mm bowl and 150mm satchler legs.

Jib rate @ \$150/day

For those who want the ultimate crane checkout our 30' Super Techno Crane

30' Super Techno Telescopic Crane

From \$1500/day

Australia's first digital 21st Century Telescopic Camera Crane here on the Gold Coast. These Super Techno 30' Cranes telescope in and out during filming offering unique camera shots that a fixed length crane is just not capable of producing.

The Techno crane is acknowledged as one of the greatest pieces of equipment to have been developed for the Film and Television industry.

Our cranes telescope in and out of shot, quickly, precisely and smoothly giving an extra dimension to any shot. The 30' reach means you can put the camera anywhere in a 60' radius without ever moving the 4 wheel steer dolly. You won't have to set up track to get your shot, saving you on the price of the crane in time alone!

The crane arrives pre-assembled in a small truck to location. Roll it out, attach one of our Remote heads or your choice of head and you are ready to shoot.

Our cranes can be set up and repositioned very quickly and easily, greatly reducing the set up time between shots – we know how precious and expensive time can be. Our technicians/Grips are factory trained in Europe under the expert guidance of the designer and manufacturer.

Aerial Camera Systems

From \$850/day

Original Trolley-Cam System

Light and Motion's original trolley cam system allows for a 2 axis remote head to be flown up to 250m across any expanse. Unlike other aerial camera systems Light and Motions Trolley-Cam system is Triaxed and Fibred allowing it to operate like a regular outside broadcast camera without the cost of expensive wireless links.

From \$850/Day + Rigging + Crew*

Lightweight Trolley-Cam System

New in 2010 is Light and Motions latest toy our budget priced lightweight Trolley Cam System. This system allows a wireless 2 axis remote head to be flown from 15m to 200m (approx) across any expanse. This lightweight system does NOT always require specialist riggers and can take camera up to 9kgs

From \$850/Day + Crew*

* Both Systems, A recce is mandatory.
Equipment used in hazardous, corrosive or hostile environments may incur additional charges for insurance and or cleaning.
Please add GST to all prices displayed. Package current as at 1/3/11
